

CompTIA CySA+ Lab: Malicious Behavior Analysis

PBQ Answer Key

Tab 1 Command: netstat -bo

Displays active TCP connections with owning process IDs.

Tab 2 Command: tasklist

Lists running processes with PID and memory usage.

Malicious File Identified: cmd.exe

Investigation Summary:

- Suspicious outbound connections identified in Tab 1.
- Multiple instances of cmd.exe observed in Tab 2 (PIDs 1916 and 2677).
- Tab 3 confirms active cmd.exe sessions.
- cmd.exe not present in baseline hash list (Tab 4).
- Indicates potential unauthorized command shell activity.
