

Cybersecurity Suspicious Login PBQ – Answer Key

1. Source IP of Concern: 41.21.18.102

- External IP address
- Successfully logged in via SFTP
- Accessed /var/www directory
- Modified index.html file
- Correlates with active netstat connection and HTTP access

2. Indicator of Compromise (IOC): Modified index.html file

- Indicates unauthorized file modification
- Suggests website tampering or malicious insertion

3. Corrective Actions (Select EXACTLY Two):

- Change the password on the sjames account
- Block external SFTP access

Rationale:

The compromised credentials allowed external access via SFTP.

Immediate password reset and restricting external SFTP access prevent further unauthorized modifications.
